

Press Release**Sequis Tower from Indonesia Wins International Architecture Awards 2018**

*Sequis Tower, an International Grade A office project in the Sudirman Central Business District (SCBD) is the only one from Indonesia selected from 31 countries and 1000 submissions.*

**Jakarta, 11 October 2018** - Sequis Tower, a premium development by with architectural design by Kohn Pederson Fox Associates (KPF) wins "The International Architecture Awards 2018" category Skyscraper/ High-Rises held at Athens, Greece on Friday (28/9).

The projects on the shortlist were judged against a range of criteria including design vision; innovation and originality; capacity to stimulate, engage and delight occupants and visitors; accessibility and sustainability; how fit the building is for its purpose and the level of client satisfaction.

**Mulyadi Janto, Head of Project Management FARPOINT** stated, *"Right now we are looking at the future of office buildings, where companies and employees have high expectations to work in smart buildings. We are happy the vision of Sequis Tower can be realized through collaboration with experts, and one of them is KPF. We are proud to see how Indonesian architecture design is receiving recognition internationally."*

*"Today's office buildings must provide important health features, offer new working culture, and more open space as a place to take a break from their busy life. Accessibility and sustainability are also important aspects to improve client satisfaction and the comfort of employees who work in the building,"* adds **Mulyadi**.

Unlike conventional modern buildings in Jakarta, the Sequis Tower design takes inspiration from the banyan tree. Providing cool atmosphere and gives a wider view of the city for its occupants. *"The design and architecture of Sequis Tower pays great attention to the environment, culture and social values,"* explained **Robert C, Whitlock, Principal KPF**. The building design also provides greater structural stability in an active seismic zone.

As the first building in Indonesia aiming to achieve LEED (*Leadership in Energy and Environmental Design*) Platinum rating certification from the U.S. Green Building Council, the project will fulfill the objectives of FARPOINT to operate buildings with measurable energy efficiency, lower environmental impact, functionality and security, and enable the flexibility needed to foster interaction and communication with colleagues from companies that are tenants of Sequis Tower. LEED certification also answers the challenges of tenants in their responsibility for the health of their workers in the work environment through better air quality and room lighting.

Targeted to start operations in March 2019, Sequis Tower not only offers premium locations in Jakarta's SCBD, but provides easy access to public transportation and MRT. Designed with innovative design and premium quality, Sequis Tower will be the premium business address that will reflect the values of integrity, excellence, efficiency and transparency that are essential for daily activities.
