

FOR IMMEDIATE RELEASE

FARPOINT REALTY HONORED WITH BEST SUSTAINABLE DEVELOPER INDONESIA AND MULTIPLE AWARDS in 2024

Jakarta, Indonesia – 23 September 2024 – FARPOINT REALTY, is proud to announce its recognition as the **Best Sustainable Developer 2024** at the prestigious Indonesia Property Awards. A leader in sustainable real estate development, In addition, FARPOINT has also secured the **Best Masterplan 2024** and **Best Affordable Housing** from the Real Estate Asia Awards for its innovative project, Maestria. Furthermore, the company received a **Highly Commended Best Affordable Housing Development** at the Indonesia Property Awards 2024.

These accolades highlight FARPOINT's unwavering commitment to environmental stewardship, innovative design, and community enhancement within Indonesia's rapidly evolving property landscape. The awards were presented at a gala ceremony attended by industry leaders, reinforcing FARPOINT's reputation as a frontrunner in responsible development.

“We are deeply honored to receive these recognitions,” said Tatang Widjaja, CEO of FARPOINT. “Each award reflects our team's dedication to creating sustainable and accessible homes. This recognition validates our belief that sustainable development is essential for the future of the property industry.”

The significance of these awards extends beyond FARPOINT. They represent a pivotal moment for the Indonesian property industry, showcasing the potential for sustainable and inclusive practices to become the norm. As the nation continues to urbanize, the importance of environmentally responsible and affordable housing solutions is paramount. FARPOINT aims to inspire other developers to adopt similar practices, fostering a collective effort to address climate change and improve community well-being.

Looking ahead, FARPOINT is committed to further innovation in sustainable and affordable development, engaging with local communities, and contributing to national goals for a greener future. The company is dedicated to leading by example, demonstrating that responsible development can drive economic growth while preserving the environment.
